About Living Fresh Collection:

The company was founded by the owners of Valley Forge Fabrics, the largest supplier of linens & fabrics to hotels & spas around the world. Fueled by their passion for the environment, Diana & Michael created a sustainable and healthy line of luxury linens available exclusively for their hotel clientele.

After a few years the guests of these hotels wanted to purchase the linens and started to contact Valley Forge Fabrics. That's when they knew they had to launch a new company to make the linens available for purchase through independent consultants.

They use carbon neutral shipping and Living Fresh Collection's trademark F.R.E.S.H. stands for Fabrics Redefining Environmental Standards for the Home.

The sheets are designed to stand up to daily washing of 160 degree temperatures and engineered not to pill. They are very silky to the skin and sleep with an even temperature, cool & dry. They are perfect for people that suffer with allergies.

About Me:

I began my career in Direct Sales in 2001. I was with another linen company for 6 yrs and then they closed. I've tried a few other businesses and then this company was introduced to me in December 2013.

I love these products! My goal is to help this company grow and expand across the country and help as many people as I can get a great night's sleep. Sleep is so important and it affects everything in your life.
